

A

Long stick & short

1

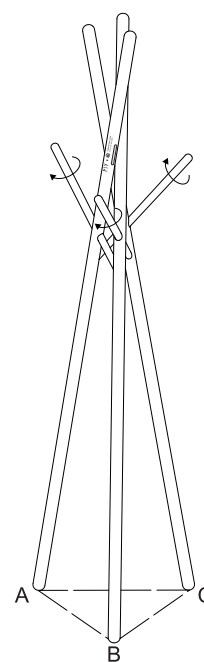

Check the staff in the package. There are three long sticks, three short sticks and an assembly manual. One of the long sticks has PIY logo and Red Dot Design Award mark on it.

Notice: To assemble the coat rack, please insert and rotate the short sticks. In order to adjust angle during assembly, please don't fix the first two short sticks tightly before the last short stick is inserted.

6

Fetch the last short stick and insert it into the holes of long stick B & C. Now rotate the three short sticks and make them tightly. Without any glue or screws, the six sticks can connect with each other tightly.

Congratulations! You have finished the assembly of NUDE coat rack, whose degree of difficulty is 18. Now you can put your clothes and caps on the coat rack.

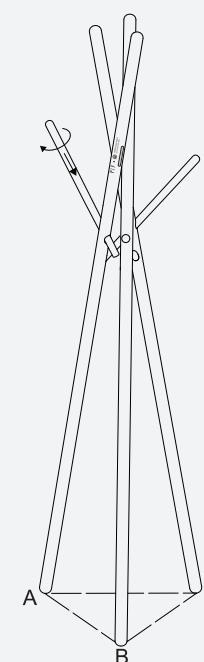

C

Long stick & short

Hold the long sticks with your right hand, fetch another short stick with your left hand, and then insert it through the hole in stick A to the hole in stick B (adjust the angle), and rotate the short stick to fix, but not too tight.

5

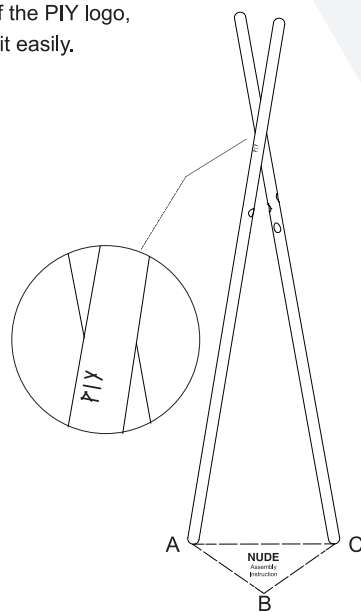

Assembly Instruction

Assembly time: 5-500 mins
(According to incomplete statistics, 15.4% of users don't read the instructions)

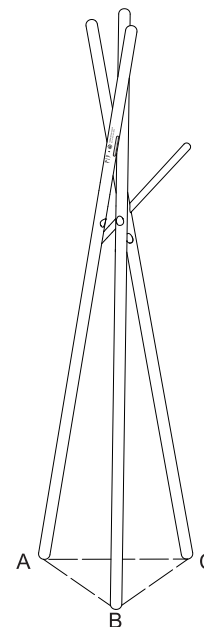

Put the triangular manual on the floor like the image shows. Hold two long sticks, put the one with PIY logo on corner A and the other one on corner C, and then make the two long sticks cross at the position of the PIY logo, and make the logo outward that your left palm can touch it easily.

2

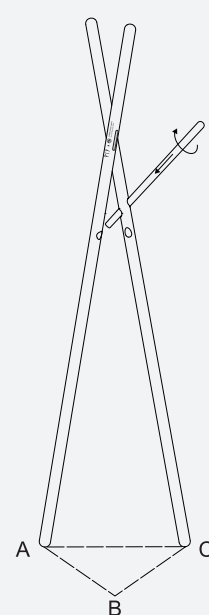

Fetch the third long stick, put it on corner B on the manual, and make the three long sticks cross at the position of the PIY logo.

4

3

Hold the two long sticks at the cross point with your left hand, fetch a short stick with your right hand, and then insert it through the hole in the long stick on corner C to the hole in the long stick on corner A, and rotate the short stick to fix, but not too tight.
